## Delivery of Waterproofing Materials for the Upper Viewing Deck

## Work Progress for Roof Top Unit at the Viewing Building

## Interior Rough In and Framing Progress at the Viewing Building

## View of the Holding Building from the Upper Deck at Viewing

## One Week Look Ahead

**The ramps and stairs to the Upper Viewing Deck to be completed next week. The asphalt waterproofing to begin along with the placement of the roof top HVAC unit and shipping container, towards the end of the week. On the interior of the Viewing Building, overhead rough in to continue for electrical, plumbing and duct work; as the framing is completed and the spray foam insulation begins.**

**The overhead steel to continue to progress for the Holding Building as the roof decking is completed and inspected prior to the insulation, blocking, sheathing and ice/water shield installation. The spray applied weather barrier, rigid insulation and girt system to begin next week. The rough in for the electrical, mechanical and plumbing to begin as well.**

## YOUR NEW SEAL AND SEA LION EXHIBIT COMING SOON

Our Passion is Building®
